

List of changes “Bifurcation to coherent structures in nonlocally coupled systems”

I did not find any major changes that distorted the equations, formulas, etc. The changes are mainly in style:

- “Sections ” are being changed to “Sects”. Example: line 33, line 34. One place where I found a little bit incoherence is line 246, right after “Sect 3.” The sentence started with “Section 4”, maybe it should be changed to “Sects” for consistency?
- In the title for a section or a paragraph, a dash has been changed into a colon, and the first letter of each word has been capitalized, also the period at the end of the title is deleted. Example: line 36: “ **Local Coupling: Result**”, which originally in our submitted paper is “ **Local coupling — results.**”
- The paragraph for acknowledgment is deleted. (after line 262)
- The title for “remark” is now not in bold font (line 143, line 166, and line 453)
- The reference to “equations” has been changed to “Eq.” Example: line 244 “See Eq.(3.2)” which originally is “See equation (3.2)” .
- The proof environment is changed, now all the proof end with an empty box instead of a solid black one.
- The labeling for Theorem 1 has been change to Theorem 1.3 (line 213, line 568 and line 569)
- This one is a typo I found in our original paper, in line 148, we had  $\tilde{M}(y) = \langle e^*, \tilde{K}(x)e \rangle$ , the  $x$  should be changed to  $y$ , same change should apply to the formula for  $M(y)$  immediately behind.
